

Tina B. West, M.D., P.C

Physician and President

The West Institute for Skin, Laser, and Body Contouring

301.986.WEST | www.westskinlaser.com

Dr. Tina West, founder of the West Institute and Board certified in dermatology, specializes in non-invasive techniques to maintain healthy, attractive skin on both the face and body. Dr. West uses the most advanced techniques in fillers (Restylane, Perlane, Juvederm and others), Botox and laser surgery to create and maintain youthful skin for life. From rosacea to acne scarring to sun damage and precancers, The West Institute has the state-of-the-art answers. Dr. West also specializes in body contouring, using the minimally invasive LipoSelection technique with only local anesthesia, and no downtime. Additional body contouring procedures at the The West Institute include VelaSmooth cellulite treatment, Thermage radiofrequency skin tightening and laser treatment of stretch marks. Our Acne Treatment Center specializes in the latest treatment options available for both adult and teenage acne.

Company Accomplishments

Dr. Tina West has been practicing cosmetic dermatology since 1996, and has trained other physicians in advanced techniques using lasers, fillers, Botox and LipoSelection. The staff of the West Institute consists of highly trained, experienced professionals who are enthusiastic about creating the best experience for each patient, including education about state of the art anti-aging skincare to specific treatment recommendations. The West Institute is all about customizing the most advanced, FDA-approved, minimally-invasive procedures to each patient's individual needs.

“You can look your best without invasive surgery ... it's all about anti-aging skincare and minimally-invasive maintenance treatment.”
